JOB PROFILE : Fresher Web and Mobile App Developer

As a Fresher Web and Mobile App Developer, you will play a crucial role in our organization's development team. You will work on web and mobile application projects, collaborating with experienced developers and gaining hands-on experience in building innovative software solutions. This role offers an excellent opportunity for freshers to kick-start their careers and enhance their technical skills in a dynamic and supportive environment.

JOB RESPONSIBILITIES :

- ❖ Development: Assist in designing, developing, and implementing web and mobile applications using industry-standard programming languages and frameworks. This includes front-end development using HTML, CSS, and JavaScript, as well as backend development using languages like PHP Laravel, code igniter or node js and mobile app development using Kotlin, Swift, or React native.
- ❖ Coding and Testing: Write clean, efficient, and well-structured code that follows industry best practices and coding standards. Conduct unit testing and debugging to ensure the functionality, performance, and security of the applications.
- ❖ Troubleshooting and Support: Identify and resolve technical issues in existing applications, ensuring their smooth operation. Collaborate with the team to investigate and fix bugs and provide technical support to end-users.
- ❖ Collaboration: Work closely with cross-functional teams, including designers, project managers, and senior developers, to understand project requirements and deliver high-quality solutions. Actively participate in team meetings and contribute ideas to improve the development process.
- ❖ Learning and Growth: Stay updated with the latest web and mobile app development trends, tools, and frameworks. Continuously enhance your skills through self-learning, online resources, and training programs. Seek opportunities to expand your knowledge and contribute to the improvement of development practices within the organization.
- ❖ Documentation: Create and maintain technical documentation, including code comments, project specifications, and user guides. Ensure documentation is accurate, organized, and accessible to team members and stakeholders.
- ❖ Quality Assurance: Assist in conducting testing and quality assurance activities, including functional testing, regression testing, and performance testing. Report and address any defects or inconsistencies identified during the testing process.

A Digital Agency That Helps You Succeed.
